

Line of Duty Death Seminar Participant Reviews

- *“It was great to have the longer day, and the chance to have so much interaction from the other participants. Witnessing the role playing was quite an experience. I look forward to our next training. Many thanks for your desire to spread the word and offer proactive training on the most often taboo subject of LODD.” EMT/Firefighter, Syracuse, NY*
- *“For someone to sit for all those hours and not be bored.....means the speaker did something very right. You made it very interesting and easy to grasp.” EMT/Operations Staff, Syracuse, NY*
- *“Thanks for the additional information and for an extremely informative session. After listening to you however, I've committed to getting things put together in the near term.” Fire Chief, Lapeer, MI*
- *“It was an eye opening experience. Twice in my ministry I have had to give notice to the loved ones after a tragic death. The considerations of an LODD, however, far surpassed my imagination. I believe you have equipped us to go back to our department and begin the process toward an LODD notification SOG.” Fire Chaplain, Rochester, NY*
- *“Pre planning is not in the front of everyone’s mind, but the need does exist. We must prepare ourselves as well as our organizations to perform whatever it takes to pay our respects in the proper fashion which our fallen brothers/sisters so richly deserve. We must be able to assist our fallen brothers/sisters families in their time of need.” Fire District Administrator, Buffalo, NY*
- *“Thanks for a great training course on Line of Duty Death preplanning. We found it to be very informative and loaded with things we never considered. We now realize we have a monumental task ahead of us, but know the importance of having a preplan and just as importantly, the consequences of not having one.” 911 Dispatcher, Rochester, NY*
